ROBOT TRAINING ACADEMY

GET THE HANDS-ON EXPERIENCE EMPLOYERS ARE LOOKING FOR

The Robot Training Academy (RTA) is a training program in Data Processing and Data Understanding.

Under the guidance of rel8ted.to staff, students gain first-hand experience in the world of data science. Learn the basics of data research, cleaning, and modelling (with some more advanced work for those who want to learn, too).

You'll leave with the training needed to launch your own data science career -- whether that's with our team or with other organizations. *Fun fact, 90% of the rel8ted.to team started in the Robot Training Academy!*

The Academy is for anyone with an interest in data analytics and AI. No data experience is required - we'll help you with all that!

WHAT YOU GET FROM THE PROGRAM

Training on how to collect, analyze, and interpret data to improve business outcomes.

Hands-on experience in the business world, in a professional and low-stakes environment.

Add this experience to your resume and take advantage of networking with experts in the field who can help you.

Earn micro-credentials to boost your portfolio and education.

Students can RSVP to join the February cohort and learn more at:

ROBOT TRAINING ACADEMY

HOW DOES IT WORK

- ➔ Students attend weekly LIVE workshops and participate in group projects.
- ➔ Earn a micro-credential when you complete a course and project.
- ➔ Network with peers, your instructors, and experts in the field.
- ➔ Get hands-on experience and list your projects on your resume.

PRESENTED WITH

- Brock University Goodman Group
- Buffalo State Data Science & Analytics
- District School Board of Niagara
- Niagara College
- Rochester City School District
- Georgen Institute for Data Science (University of Rochester)
- **...and other universities.** All students are welcome to register.

ABOUT REL8ED.TO

rel8ed.to Analytics enables deep business data analytics on Big + Open Data, delivering hidden insights about corporations and key employees. We combine our global graph of business data with proprietary algorithms, revealing essential links between businesses, owners, suppliers, and competitors.

Public and Private Sector Clients use our data + analytics to understand the world, protect against fraud and risk, and stand guard in dangerous times. Learn more about what we do at www.rel8ed.to
